

Top-Locking Slats

As an alternative approach to our Bottom-Locking Slat, these slats also provide an economical and attractive way to enhance any chain link fence. The locking system is located near the top of the slats to ensure a clean, straight edge, further enhancing its appearance.

FEATURES

Design: Top-Locking Slats are flat and tubular in shape, with circular notched out holes located near the top of the slat.

Fast & easy installation: There is no need to kneel down! Simply insert the slats vertically from top to bottom, keeping the locking holes on top. Then thread the flexible locking channel horizontally through the notched holes in the slats. These holes are elliptical to ensure they always stay open for fast and easy threading.

Standard heights: 4, 5, 6, 7, 8, 10, & 12 feet.

Slat length: 2" shorter than the overall height of fence.

Flexible, top-locking channel: Also available on a continuous 200 ft. reel for larger jobs.

Wind load & privacy factor: Approximately 75%.
